 with 100C  
 plug
- 4.193 Extension for  
 connecting lamp  
 without dolls house  
 light socket

Caroline's Home has been designed from the outset to be just that little bit special, a doll's house orientated towards children, that's full of things they'd love to discover. Decorated inside and out with a profusion of animals, birds and flowers that bring the house alive and stimulate the child's interest and involvement. Mum and Dad haven't been forgotten either. The interlocking nature of the design together with the best quality materials ensures value for money in a toy that is built to last.

The integral wiring circuit has plug points in each room and all the windows, shutters and doors are hinged enabling the child to operate them just like the real thing. To compliment the house we also offer a complete range of furniture and accessories all in matching decoration.
